Steel Dock Barricade Electric/Hydraulic 10 Ft. Yellow

MODEL DJG-100-10

Loading Dock Equipment / Dock Barricades

PRODUCT OVERVIEW

The dock barricade is an active barrier that represents the next generation of innovative loading dock safety systems. The electric/hydraulic power unit provides quick and effortless operation. It is electronically operated and consists of an electrical bumper-style safety stop circuit to sense obstructions when lowering. Includes a lock bar on the arm post to restrict rotation of the barricade arm, padlock not included. Installation is simple, anchor the unit to the floor and plug in.

KEY FEATURES

- Unique design protects open doorways at loading docks
- Bottom arm safety stop will reverse direction when contacted
- Safety yellow finish with black & yellow safety tape signals a slow down point
- Steel construction can stop a loaded 4,000 pound fork truck at 4 miles per hour
