Factory Installed Steel Roll Off Guard For Electric/Hydraulic Dock Levelers Brown

MODEL EH-ROG

Loading Dock Equipment / Electric Hydraulic Dock Levelers

PRODUCT OVERVIEW

A standard electric hydraulic dock leveler is important for high traffic dock areas. However, an electric hydraulic dock leveler with additional raised safety lip makes a dock leveler even more necessary. The raised lip is a roll off guard feature which adds safety to the user and accompanying personnel. The raised edge continues to maintain its height until the dock leveler is in the raised position. When the deck reaches the raised position the lip will automatically extend.

KEY FEATURES

- Raises and lowers with dock leveler
- Supports safety and security
- Tread plate surface for consistent traction
- Restricts dock leveler roll offs
